Rich,

Not sure it was me that showed you how to do it, but think I know how to turn it off. First highlight Row 1 and the click on "Data" in the header on Excel. Under Data Tools you should see a Data Validation box. Under the "Settings" menu you should see the word "Allow:" with a drop down menu below it. Click on drop down menu and select "Any Value", it is probably set to the word "List" currently.
